Liani Ovalles

JUNIOR SOFTWARE ENGINEER | C# AND .NET

xcape.worlds@gmail.com | github.com/xcapeworlds-cloud
Portfolio: xcapeworlds-cloud.github.io/software-engineer-portfolio/

PROFESSIONAL SUMMARY

Self-taught developer with hands-on project experience in C#, .NET 8, Unity, and mobile applications.
Built reusable software components, automated checks, gameplay systems, and a published iOS puzzle game.
Skilled in debugging, problem solving, code organization, and learning through independent projects.

TECHNICAL SKILLS

Languages: C#
Development: .NET 8, console applications, class libraries, object-oriented programming, Unity
Testing: automated assertions, manual testing, debugging, bug reproduction, feature verification
Tools: Git, GitHub, GitHub Actions

SELECTED PROJECT EXPERIENCE

Progression Engine | .NET 8

Built a console application and reusable class library for reward and upgrade calculations.
Separated business logic from user input, added validation and checked arithmetic.
Wrote 13 automated assertion cases and configured a GitHub Actions build and test workflow.

Sugar.io | Unity and C#

Developed gameplay systems including AI decisions, target selection, obstacle avoidance, and recovery.
Worked on movement, collisions, growth, combat, and destructible environment interactions.
Organized a 29-script source showcase with architecture notes.

Sticker Puzzles: Match Scenes | Published iOS Game

Implemented sticker placement, target matching, puzzle completion, and hint interactions.
Improved placement usability with snapping near valid targets.

How Far Can You Ramp? | Multiplayer Systems

Developed progression, rewards, upgrades, and randomized reward systems.
Investigated vehicle return issues and verified a timed occupancy check in multiplayer sessions.

ADDITIONAL EXPERIENCE

Created an interactive music system for a 3D social gaming platform using visual scripting.
Built playback controls, hand-position timeline scrubbing, volume and speed controls, and a ten-level song quiz.

CAREER INTEREST

Seeking entry-level software engineering, software developer, application developer, and C#/.NET roles.
