Liani Ovalles

Junior Software Engineer | C# Developer

xcape.worlds@gmail.com | github.com/xcapeworlds-cloud
xcapeworlds-cloud.github.io/software-engineer-portfolio/

SUMMARY

Entry-level C# developer with project experience in .NET, Unity, and mobile games.
Experienced in debugging, implementing features, and testing changes.

SKILLS

C#, .NET 8, Unity, OOP, class libraries, input validation, gameplay AI
Debugging, automated assertions, manual testing, Git, GitHub Actions

PROJECT EXPERIENCE

Progression Engine | .NET 8

Built a console application and class library for rewards and upgrade calculations.
Separated business logic and input; added 13 automated assertion cases.
Configured a GitHub Actions build-and-test workflow.

Sugar.io | Unity / C#

Built tornado arena gameplay systems with AI navigation and obstacle handling.
Worked on movement, collisions, growth, combat, and destructible environments.
Organized a 29-script code showcase with architecture notes.

Sticker Puzzles: Match Scenes | Published iOS Game

Implemented sticker placement, matching, completion, and hint interactions.
Improved placement usability with snapping near valid targets.

How Far Can You Ramp? | Multiplayer

Implemented rewards, upgrades, rebirth progression, and randomized rewards.
Fixed vehicle return behavior and tested the change in multiplayer sessions.
